### RESEARCH PROJECTS

MS SCHOLAR Jan 2018 to Present	<b><a href="#">Networks Group, IIT Madras</a></b> <b>Guide : <a href="#">Prof. Balaraman Ravindran</a>, <a href="#">Prof. Shankar Narasimhan</a></b> <ol style="list-style-type: none"> <li>1. Utilizing the tensors based representation for hypergraph</li> <li>2. Proposing a novel framework for hypergraph partitioning using tensor eigenvalue decomposition.</li> </ol>
M.TECH THESIS June 2015 to May 2016	<b>Identification of Linear Dynamic Systems using Dynamic Iterative PCA</b> <b>Guide : <a href="#">Prof. Arun K. Tangirala</a>, <a href="#">Prof. Shankar Narasimhan</a></b> The work is concerned with identifying models from data that have errors in both outputs and inputs, popularly known as errors-in-variables (EIV) problem. We developed a novel and systematic approach to the identification of linear dynamic models for the EIV case in the principal component analysis (PCA) framework which provides unbiased model with minimal user intervention. The work is published and can be found <a href="#">here</a>
